Black Mountain Products®

Important: Read all warnings and cautionary statements to reduce risk of injury when using your exercise ball.

1. Consult your physician before beginning any regular exercise program.
2. Always examine your B.M.P.® exercise ball for any defects, cracks, cuts, tears, or imperfections before use. If there are any imperfections, stop using ball immediately, and contact B.M.P.® support.
3. DO NOT try and repair exercise ball in any way.
4. Do not use B.M.P.® exercise ball for any use than exercise.
5. Do not over inflate B.M.P.® exercise ball.
6. Do not under inflate B.M.P.® exercise ball.
7. Warm up before starting any exercise routine.
8. If you feel any pain or experience any dizziness while exercising you should stop immediately.
9. When exercising, be careful not to let B.M.P.® exercise ball slip out on you.
10. When starting exercise, start slowly. Movements on the ball should be slow and controlled for safety.
11. Use B.M.P.® exercise ball only as directed.
12. This ball is not a toy. Children below the age of 18, use only under adult supervision.
13. Use only on nonabrasive surfaces such as carpeting, exercise or yoga mats.

Warranty:
1. All exercise balls are fully warranted for life.
2. Inform Black Mountain Products® by telephone or e-mail if there is any missing, damaged, or defective products.
3. Warranty does not cover any incidental damage.
4. Void, where limited or prohibited by law.
5. B.M.P. reserves the right to alter the warranty at any time.

**Instructions for Inflating**

*Please note sizes are approximate and meant to be used as a guideline.

Height: Ball should be 14 inches tall from floor to top of the middle of the ball. 
Length: Ball should be 32 inches long from end to end.

1. Remove valve plug from reseal able bag.
2. Insert end of the pump hose into ball to inflate.
3. Inflate ball to size of height and length. The ball may not meet the sizes exactly based on the firmness with which you are trying to achieve.
4. Quickly pull out pump and insert plug into valve to secure inflated ball.

*All balls **MUST STRETCH** to achieve proper size. This allows the ball to be stretched for proper functionality and use.

* DO NOT **UNDER** inflate. Not fully inflating ball to correct size can cause risk of injury and may damage the ball. With correct inflation, each exercise ball will be very firm with a slight indentation when pressure is applied.

* DO NOT inflate your exercise ball when the room temperature where you will use the ball is greater than 90° F or below 32° F.

* DO NOT use an air compressor to inflate the exercise ball. Air compressors blow cold air that could expand after returning to room temperature.

*Only inflate ball with pump that is included with exercise ball. 
*Pump will not allow ball to be over inflated.

**Information about Exercise Ball:**

Important: Read all warnings and cautionary statements to reduce risk of injury when using your exercise ball.

1. Inflate ball only as described. Improper inflation may cause damage to ball.
2. Wear appropriate clothing and footwear to protect ball from any incidental damage.
3. Remove all objects from your body such as rings, watches, belt buckles, or any sharp object that could potentially puncture ball during use.
4. Clean exercise ball with a soft cloth with warm, soapy water. Do not use abrasive or chemical cleaners.
5. Use ball on a padded non-abrasive floor to prevent slipping and abrasion to the ball.
6. The ball should be used only indoors.
7. Do not exceed weight limit of 2000lbs of force exerted to ball.
8. It is not recommended to use additional weights while performing exercises, which could potentially cause the user to exceed maximum weight.
